PROFESSIONAL SUMMARY

Software Engineer and Backend .NET Developer with a Bachelor's degree in Computers and Systems Engineering (Al-Azhar University, Very Good). Hands-on experience building production-grade REST APIs with C#, ASP.NET Core, Entity Framework Core, and SQL Server using Clean Architecture, CQRS, and MediatR. Delivered backend features end-to-end, from domain modeling and architecture through testing, CI/CD, and deployment, while collaborating with AI and Frontend teams. Seeking a backend role where I can build scalable, secure, and well-tested systems.

TECHNICAL SKILLS

Languages and Frameworks: C#, .NET, ASP.NET Core, ASP.NET Core MVC, ASP.NET Core Identity, REST APIs, Microservices, MediatR, JWT, Real-Time Notifications

Databases and ORM: SQL Server, T-SQL, Entity Framework Core, ADO.NET

Architecture and Patterns: Clean Architecture, CQRS, Domain Events, Result Pattern, Design Patterns, SOLID, OOP

Testing: Test-Driven Development (TDD), xUnit, Unit Testing, Subcutaneous Testing, Integration Testing

Tools and DevOps: Git, GitHub, GitHub Actions, CI/CD, Docker

Core Concepts: Data Structures, Algorithms, Role-Based Access Control (RBAC), Authentication, Authorization, Business Analysis, Domain Modeling

Soft Skills: Teamwork, Communication, Problem Solving, Ownership, Time Management, Adaptability, Attention to Detail

WORK EXPERIENCE

AI for Business Intern

National Telecommunication Institute (NTI) | Egypt (On-site) | Oct 2026 - Present

- Completing on-site training in applying artificial intelligence and Machine Learning to business problems.

Junior Backend .NET Developer Intern

Huma Volve | Remote | Oct 2026

- Developed backend features using ASP.NET Core and Entity Framework Core.

Associate Software Engineer Intern

SpaceTech | Alexandria, Egypt (Remote) | Sep 2026

- Developed backend features using ASP.NET Core and Entity Framework Core.

Backend Development Trainee (ASP.NET Core and Clean Architecture)

Metigator | Jun 2025 - Aug 2025

- Built REST APIs for authentication, scheduling, work orders, and invoicing.
- Applied CQRS, MediatR, Domain Events, and the Result Pattern across application layers.
- Implemented Entity Framework Core, ASP.NET Core Identity, and real-time notifications.
- Applied unit, subcutaneous, and integration testing, and used Docker, code style enforcement, and GitHub Actions for CI/CD.
- Completed a Business Analysis and Domain Modeling module, including creating a Product Requirements Document (PRD).

.NET Backend Developer / Back-End Trainee

Programming Advices 24 | Jul 2023 - Jan 2025

- Built backend solutions with C# and .NET through a two-year foundational training program.
- Used ADO.NET and Microsoft SQL Server to write optimized T-SQL queries.
- Applied algorithms and data structures to solve complex technical problems.

PROJECTS

Mechanic Shop Management System

Metigator Training Project | Jun 2025 - Aug 2025 | github.com/fou1100ouacus/Mechanical-Shop

- Built the backend for a platform managing customers, vehicles, work orders, technicians, and scheduling.
- Modeled core entities with business rules, such as VIN uniqueness and protected-delete constraints.
- Implemented the work order lifecycle (Scheduled, In Progress, Completed, Cancelled) with automatic cancellation of no-show appointments after 15 minutes.
- Built scheduling logic to prevent double-booking of technicians and service bays.
- Implemented role-based access control (Manager and Technician roles) with secure authentication.
- Applied Clean Architecture, CQRS, and MediatR using .NET 10 and Entity Framework Core; optimized the APIs to meet sub-500 ms response-time targets.

AutiCare (Eshraqa) - Graduation Project

Al-Azhar University | 2025 - 2026 | github.com/fou1100ouacus

- Built backend services for an AI-powered daily support app for mothers of children with autism using ASP.NET Core, Entity Framework Core, and SQL Server.
- Implemented JWT authentication, a mandatory legal-disclaimer flow, and a one-child-profile rule.
- Developed REST APIs for daily tracking, video uploads via presigned URLs, a resource library, and community features (posts, reactions, and comments).
- Built a moderation system featuring keyword blocklist scanning, review workflows, and audit logging.
- Applied Clean Architecture and collaborated with AI and Frontend teams under academic supervision.

Car Rental System

Personal Project | github.com/fou1100ouacus/Car-Rental-System

- Built an all-in-one platform to streamline rental operations, including vehicles, customers, bookings, and finances.
- Managed detailed vehicle profiles (make, model, fuel type, mileage, and availability) as well as customer contact details and rental histories.
- Handled the complete rental workflow, from vehicle availability and customer bookings to rental history and financial tracking.

Driving and Vehicle License Department (DVLD) - License Management System

Personal Project | github.com/fou1100ouacus/Driving-License-Management-

- Built a system to manage the issuance and administration of driving licenses, ensuring that only qualified drivers are licensed.
- Supported new license issuance, renewals, replacements, and international license management.
- Developed with .NET, ADO.NET, and SQL Server, following clean code principles and performance-focused database access.

EDUCATION

Bachelor's Degree, Computers and Systems Engineering

Al-Azhar University, Faculty of Engineering (Graduation Certificate) | 2021 - 2026 | Grade: Very Good

COURSES

ASP.NET Core API Diploma: Metigator - Mastering ASP.NET Core: Concepts to Production-Ready APIs | Jun 2025 - Aug 2025

Back-End Diploma: Programming Advices 24 | Jul 2023 - Jan 2025

LANGUAGES

Arabic: Native | English: Professional Working Proficiency
